# ACKNOWLEGDEMENT

It is effort of us all that today we are able to make this helpful project. I am really thankful to them all.

Our project contains various features and functions of JAVA. It will be helpful to the user to understand the project and its components such as use of loops, methods, if else etc. Easy language and simple grammar is used in the project for better understanding.

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

THANK YOU.

- This project deals with the concept of the MANAGEMENT OF SALARY OF AN EMPLOYEE, made using JAVA programming language. When one executes the program he/she has to enter his/her required details such as:-
- Employee,s full name
- His/Her designation/post
- No. of days he/she attended
- Employee's address
- and gender

米

米

\*\*\*\*\*

\*\*\*\*\*

\*\*\*\*\*

\*\*\*\*\*\*\*\*\*\*

米

On full filling the criteria, the program executes and calculates the HRA, DA, PF on the basis of the basic salary the employee receives. The employee is also entitled to pay tax if his/her salary exceeds 20,000.

Besides, the employee is also rewarded for his/her regularity in the office.

### HARDWARE REQUIRREMENTS

米

\*

- MONITOR to view the output.
- C.P.U -to process the information.
- MOUSE -to select options.
- KEYBOARD -to input information.

#### SOFTWARE REQUIREMENTS

- BlueJ is an Integrated Development Environment specifically designed for teaching at introductory level . (version 3.1.6).
- Microsoft Word is a software specially designed to enhance the quality of writing, providing various features such as, fonts, break, bullet and numbering etc. (version 2007).
- JAVA is a robust, object-oriented, platform independent language created by James Gosling. BlueJ provides an integrated environment for JAVA language.
  - JVM the devices which are equipped with JAVA interpreters that can read the byte code are called Java Virtual Machine

JAVA: JAVA is a third generation programming language originally developed by James Gosling at Sun Microsystems. JAVA was released in 1995 as the core component of Sun Microsystems' JAV platform.

Thus, JAVA is a robust, platform - independent, object - oriented programing language.

BlueJ:- The BlueJ project started at Monash University in Melbourne, and later split and migrated to its current locations. In march 2009, BlueJ project became free and open source software.
